## PAVERS RE-INVENTED

Recycled materials combined with cutting edge technology, AZEK Pavers are the most advanced pavers in the world.

AZEK PAVERS —  
SIMPLY A  
BETTER PAVER

Made of up to 95%  
Recycled Materials

- Scrap Tyres and Plastics
- 3 Beautiful Colours

More Durable

- Scratch Resistant
- Stain Resistant
- No-Crack Guarantee (residential only)

Low Maintenance

- No Efflorescence
- No Sealing
- Easy Cleaning
- Easy Replacement

Easiest-to-Install Paver

- Reduced Installation Time
- Lightweight
- No Specialised Tools Required
- Patented Installation Grid

Resurfacing Pavers

Made in the USA, AZEK Pavers are the most environmentally responsible paver available. Did you know that a 46 square metres patio is made of 250 truck tyres and 28,000 litre sized plastic containers. This alone has saved over 9 million kilograms of garbage from entering US landfills.

With five stone-like colour options, you can mix-and-match your paver surface to create a truly unique design. Customise your project to match your personal style with one of many possible patterns, e.g., Running Bond, Herringbone, or Basketweave.

## THE AZEK DIFFERENCE...

- Recycled materials combined with cutting edge technology, AZEK Pavers are the most advanced pavers in the world.
- Made from up to 95% recycled content - scrap rubber tires and plastic containers.
- Easier and softer to walk on.
- Unaffected by freeze/thaw, salt and most other spills or chemicals.
- Guaranteed not to crack. (residential use only)
- Better colour retention than traditional pavers.
- Resistant to staining, scratching and impact.
- Sealing and staining is not required nor recommended.
- No efflorescence or chalky appearance.

BEFORE  
WITH KETCHUP  
AND COOKING OIL

AFTER  
NOTICE THE AZEK  
DIFFERENCE

## STAIN RESISTANCE

Apply a small amount of ketchup and cooking oil to both the AZEK Paver and the concrete paver.

Allow liquids to sit on the AZEK Paver while quickly wiping off the ketchup and oil from the concrete paver.

Notice the stain marks left by the liquids on the concrete paver.

Wipe the ketchup and oil from the AZEK Paver to reveal no stain marks left behind.

NOTICE THE AZEK  
DIFFERENCE

## SCRATCH RESISTANCE

Use the flat end of a screw driver and push across the surface of an AZEK Paver and a concrete paver.

Notice the concrete paver scratches easily while the AZEK Paver resists scratches.

AZEK PAVER  
AFTER BEING  
HIT WITH HAMMER

CONCRETE PAVER  
AFTER BEING  
HIT WITH HAMMER

## DURABILITY

Use a hammer or another brick to hit a corner of the concrete paver and see what happens to the edges.

Strike the AZEK Paver or throw it on the ground to see its durability.

AZEK Pavers resist degradation over time and retain their outstanding appearance longer than that of traditional concrete pavers.

NOTICE THE AZEK  
DIFFERENCE

## REST EASY

10-Year warranty on all AZEK Pavers

Lifetime warranty against cracking  
(residential applications only)

## WHY THE GRID?

Patented AZEK grid makes installation easy and nearly fool-proof.

Increases laying speed on average by three times.

Automatic alignment and spacing of pavers (no more string lines).

Pavers sit flat even without the use of a rubber mallet.

Multiple starting points and you can walk on the grids without disrupting the sand.

Overlapping the grids with pavers creates one inter-connected system and prevents unsightly gaps over time.

09

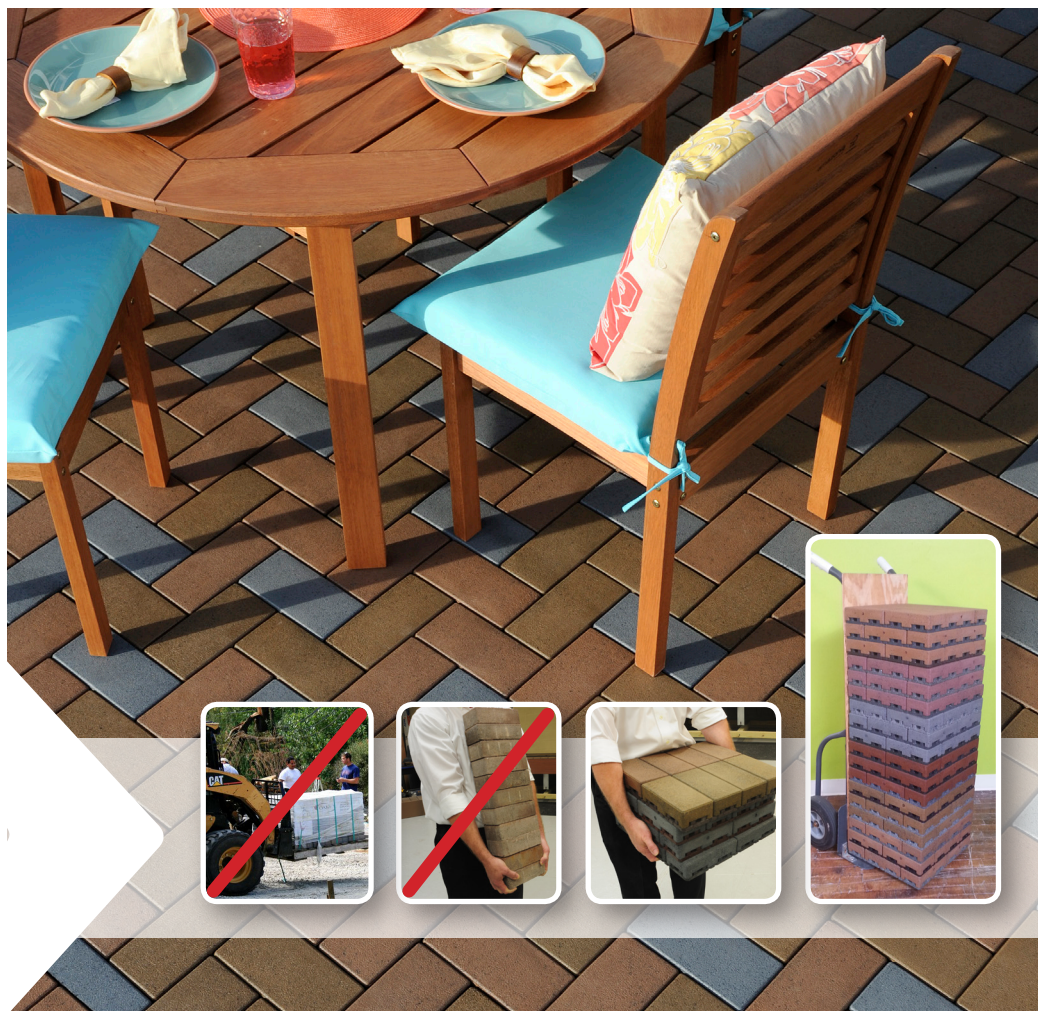

## WEIGHT MAKES A DIFFERENCE

Skip the skid steer and use a hand trolley to quickly maneuver product. No more tearing up the yard!

Instantly pick up 32 pavers (over 5 square metres) vs. individually picking up 11 pavers (0.22 square metres). Same weight!

Significantly reduce fatigue and injury from working with heavy concrete.

Pavers on a deck? It's now possible!

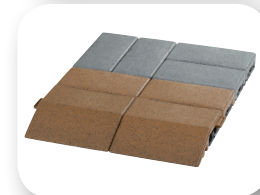

# Accessory Pavers

AZEK Pavers cut easily with a jigsaw or mitre saw.

No more expensive diamond blades and wet saws.

No more concrete dust or deafening noise.

Use AZEK Resurfacing Bullnose or Transition Pavers to finish the perimeter of resurfacing applications.

Resurfacing  
Bullnose Paver

Engineered to resist cracking and staining, AZEK Pavers provide long lasting good looks and are guaranteed for life not to crack (residential applications only).

AZEK Pavers use a patented grid system that dramatically reduces installation time and takes the frustration and difficulty out of manually setting and aligning heavy concrete pavers.

Made from up to 95% recycled materials, AZEK Pavers help projects earn LEED certification easier than any other pavement. AZEK Pavers outperform other pavers in LEED contribution, such as concrete pavers with fly ash, by more than 10 times.
